

RESUMÉ

Chelsea Clark

Job Captain

PROFESSION

- Certified Passive House Consultant
- AIA Associate
- LEED Green Associate

EDUCATION

- University of Oregon; Master of Architecture & Specialization in Historic Preservation, 2019
- Miami University of Ohio; B.S. Architecture, 2017

FIRM RESPONSIBILITIES

With previous experience in permanent supportive, affordable and market-rate housing, Chelsea works with the project architect to design, coordinate, and assemble drawings at all phases of design. She also helps lead Denver's sustainability efforts through energy modeling, implementing Passive House strategies, and coordinating research with the San Francisco office.

PERSONAL PROFILE

Chelsea enjoys pursuing both affordable and sustainable architecture. This passion for equitable design originated in undergrad through collaboration with a community of artists at the Za'atari Refugee Camp to design shade structures for their growing camp. Chelsea then continued her education at the University of Oregon in Portland where she focused her thesis on new refugee housing and community support with a Passive House Design overlay.

Her work experience continues to highlight a need for affordable and supportive housing especially through the lens of environmental justice. She is always looking for energy efficient solutions for the future residents of our projects because she believes that a healthy and comfortable home is a right by all.
